

CentraSep[®]

Centrifuge Purification Machines

Overview

Trucent's CentraSep family of centrifuge purification modules have been installed in 956 customer locations in 22 countries. Ranging from liquid/solid, liquid/liquid, 3-phase separation of process fluids, the CentraSep centrifuges have become a best practice for countless manufacturers across a variety of industries. Our CentraSep centrifuges are backed by nine service facilities and over 100 trained technicians spread throughout North America.

What Trucent Offers

Trucent offers improved product quality and throughput, reduced operation costs, and improved environmental, health, and safety. We do this by combining our expertise and industry-leading technology, with a level of consistency that plants can't live without.

CentraSep centrifuges are available for purchase, or lease/rental with Trucent's Purification Services. They are also an integral component to Trucent's Fluid Performance Programs.

WHO WE ARE

Trucent is the leader in fluid separation services and technology. We innovate engineered solutions to complex challenges to help build businesses, preserve precious resources, and create a sustainable future.

OUR OFFERINGS

Centrifuge Parts and Repairs
Technology Sales
Client Site Services
Full On-Site Management Programs

RESOURCES

Fully Stocked Parts Warehouse
Access to OEM Parts
Fully Equipped Laboratory
Fleet of Mobile Purification Systems
Pilot and Testing Laboratory
Purchasing and Inventory Systems
Remote Monitoring Software

OUR TEAM

Fluid Chemists and Engineers
Mechanical Engineers
Field Service Technicians
On-Site Technicians
Account Managers
Part Sales

LOCATIONS

Dexter, Michigan
Milwaukee, Wisconsin
Noblesville, Indiana
Mooresville, Indiana
Cincinnati, Ohio
Ardmore, Tennessee
Omaha, Nebraska
Cambridge, Ontario
Monterrey, Mexico

CentraSep Industries Served

Metalworking, Ethanol and Corn Oil Extraction, Glass and Brittle Material Fabrication, Craft Beer, Water Wash Paint Booths, Wastewater Treatment, Biochemical, Pharmaceutical, etc.

DX Series
Designed for
Metalworking

S Series
Designed for Glass
& Brittle Materials

DB Series
Designed for
Craft Beer
Clarification

COSS Series
Designed for
Ethanol – Corn
Oil Extraction
