

A PARADIGM SHIFT in GLASS FILTRATION

- **Processing Capacity:** With processing capacities ranging from 10 GPM and higher, QuantumClear offers unparalleled efficiency and performance for architectural, solar, automotive, and precision glass applications.
- QuantumClear leverages advanced technology for *real-time fines separation*, ensuring uninterrupted filtration and producing a substantially *moisture-free cake*.
- **Returns ultra clean fluid back to the fabrication process.**
- **Q-Series Filter System:** Real-time fines separation.
- **Efficient Filtration:** Separates grinding fines and reintegrates clean fluid with uninterrupted filtration.
- **All-Inclusive System:** Pre-mounted, piped, and wired for seamless integration.
