

PRODUCTS METAL WORKING AND LUBRICANT INDUSTRIES

Trucent Renewable Chemicals (TRC) is North America's newest oleochemical manufacturer, strategically located in the Midwest. Specializing in meeting the demands of metalworking and lubricant formulators, TRC offers domestically grown, processed, and supplied Oleic Acid and TOFA alternative products.

Committed to ethical sourcing, all TRC products are Kosher-certified and derived from non-tallow/palm sources. In a landscape marked by supply chain volatility and ethical concerns surrounding palm products, alongside dwindling availability of tallow and crude tall oil, TRC presents reliable, sustainable, and domestic vegetable oil based TruFA™ fatty acid products.
