

Rethinking Oleochemistry

## Adjuvants & Agrichemical Industries

Trucent Renewable Chemicals (TRC) is a North American manufacturer of oleochemicals, strategically located in the Midwest. Through controlled production processes and the use of domestically sourced, plant-based feedstocks, TRC delivers fatty acids with consistent composition and dependable supply.

For adjuvant and agrichemical applications, performance in the field begins with consistency at the raw material level. TRC's oleic acid and TOFA alternative products are produced to meet formulation requirements where stability, compatibility, and repeatability are essential.

Domestic sourcing and production reduce supply chain uncertainty and provide greater visibility into feedstock origin and processing. All TRC products are non-tallow, non-palm, and Kosher-certified, supporting customers seeking alternatives to traditional global supply streams. TRC offers a reliable fatty acid platform designed to support formulation performance and supply continuity across agricultural applications.

## FATTY ACID PRODUCTS

Product	Description	Iodine Value	Color Gardner	Acid Value	C18:1 Oleic	C18:1 Linoleic	C18:3 Linolenic
TruFa FF-4005	<b>TOFA Alternative (w/o rosin*)</b> <i>(L-5 or FA-1 alternative)</i>	120 Min	5 Max	193 Min	44	40	6
TruFa FF-4009	<b>TOFA Alternative (w/o rosin*)</b> <i>(L-5 or FA-2 alternative)</i>	120 Min	9 Max	193 Min	44	40	6
TruFa OA-3075	<b>75% Oleic Acid</b> <i>(compare to palm products)</i>	95 Max	3 Max	195 - 205	77	10	3
TruFa OA-3100	<b>70% Oleic Acid</b> <i>(compare to tallow products)</i>	105 Max	5 Max	196 - 206	72	15	4

\* This product is available in varying rosin acid content levels through TRC partner, Resinall Corp.

TRC strategically and efficiently services our customers from our manufacturing facility in Van Wert, Ohio, via rail car, tank wagon, or packaged goods delivery.
