

Innovating a Better Way in Corn Oil Separation

Better Yield. Cleaner Oil. Smarter Service.

The Trucent Oil Concentrator System delivers cleaner DCO

The Trucent Oil Concentrator System is a proprietary concentrating system that keeps finished corn oil moving to prevent stagnation and buildup. Its advanced programming enables additional cleaning by continuously removing impurities from the oil.

In addition to a cleaner finished oil, transfer pipes are kept clean and clear, reducing the need for hydro-blasting or pipe replacement.

Maximize Your DCO Potential

Unlock the full potential of your distillers corn oil extraction with the Trucent Oil Concentrator System. Enhance the value of your finished oil while maximizing extraction efficiency. Experience cleaner oil with improved impurity removal and enjoy the benefits of an optimized finished oil process.

How the Trucent Oil Concentrator System is designed

The Trucent Oil Concentrator System enhances the quality of finished oil. Through advanced concentration technology, it effectively treats finished oil, resulting in a significantly cleaner product. It removes remaining impurities and also prevents the oil from becoming static, offering the potential for additional DCO extraction.

Quit Ducking Around.
Because quality matters.
